

## 6. Repair

In case of any necessary repairs, maintenance or inspections, we will also provide you with all the necessary facilities at our factory in Nassau as a matter of course.

Our technicians make use of all devices, machines and tools for this purpose. They also have access to the warehouse with over 30,000 parts. This way, your cooling unit will be ready for use again in no time.

The equipment in our factory allows the machine processes to be displayed under real conditions, which speeds up and simplifies fault analysis.

### The repair services in detail:

- Inspection and assessment of machines returned by customers
- Prompt preparation of cost estimates
- Making repair recommendations
- Fast, qualified repairs – we only use original spare parts for these.
- Carrying out functional and performance tests after the repair
